

Resources To Support the Implementation of Exemplary Sexual Health Education

FOR CDC/DASH PS13-1308 FUNDED PARTNERS

Exemplary Sexual Health Education (ESHE) requires effective implementation of curricula and programs in order to impact positive health behavior outcomes of students. State Education Agencies (SEAs) can provide the guidance necessary for school districts to implement ESHE. But how does a school district know if their curricula and programs are being implemented adequately? What can an SEA provide to their school districts to support their implementation of ESHE?

CDC/DASH has provided the *Program PS13-1308 Guidance: Supporting State and Local Education Agencies to Reduce Adolescent Sexual Risk Behaviors and Adverse Health Outcomes Associated with HIV, Other STD, and Teen Pregnancy* (CDC/DASH Program Guidance) to support the ESHE activities of the PS13-1308 Cooperative Agreement. Advocates for Youth has compiled this set of resources, as examples and opportunities for adaption, to assist SEAs with providing support to their school districts to address and plan for the implementation of their curricula and programs prior to and throughout the process. Advocates for Youth is here to provide more customized assistance at any time.

How else can Advocates for Youth support SEA ESHE work?

The School Health Equity team at Advocates for Youth can provide technical assistance, capacity building assistance and additional resources to SEAs as they address ESHE implementation with their priority districts.

We can assist with the using of the CDC/DASH Program Guidance and these additional ESHE resources.
